- concept art
- Autodesk maya, modeling
- Communication Skills
- Autodesk 3DS MAX
- Unreal engine
5, environment artist, archviz

LANGUAGE

- English
- Gujarati
- Hindi

PROFILE

I'm a passionate Architectural Visualization Artist who transforms architectural ideas into visually stunning and emotionally engaging 3D experiences. My work focuses on bringing designs to life through realistic lighting, composition, and storytelling — helping architects, designers, and developers communicate their vision with clarity and impact.

With a strong foundation in 3D modeling, texturing, lighting, and rendering, I specialize in creating both photorealistic stills and cinematic animations that highlight the essence of every project. I enjoy blending artistic creativity with technical precision to produce visuals that not only look beautiful but also feel real.

ACHIEVEMENT

NSDC Skill India – VFX Certification Achievement

Successfully completed the National Skill Development Corporation (NSDC) – Skill India Certification in Visual Effects (VFX), demonstrating strong creative and technical skills in compositing, motion graphics, and digital post-production.

WORK EXPERIENCE

Smart Shaper

Exhibition Stall Designer

Worked as an Exhibition Stall Designer for 6 months, creating 3D stall layouts, concepts, and realistic renders for trade shows and events. Skilled in spatial design, branding visualization, and client-based customization using tools like 3ds Max.

Align Studio

Junior Archviz Artist

Worked as a Junior Architectural Visualization Artist for 1 year, specializing in creating realistic 3D environments, interiors, and exteriors using Unreal Engine, 3ds Max, and Photoshop. Experienced in lighting, rendering, and material optimization for high-quality visual presentations.
